## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8 and 1-23, drawn to issuing a senior and junior class of securities based on a trust, classified in class 705, subclass 37.
  - II. Claim 9, drawn to creating a single trust, classified in class 705, subclass 35.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of forming a trust does not require the method of issuing a senior and junior class of securities based on the bonds held in a trust. The subcombination of invention II has separate utility such as using the trust to securitize bonds into a junior and senior class of securities.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if

any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. A telephone call was made to 202.408.4000 on 2/2/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

### **Conclusion**
